

Quan Le Anh

SENIOR UNITY DEVELOPER · MOBILE & PC GAMES

+84 383 436 893 | quanla.uet@gmail.com | quanlaq.github.io/portfolio/ | linkedin.com/in/qqnn1311

Senior Unity Developer with 7+ years of experience developing and shipping mobile, PC, and WebGL games. Experienced in gameplay architecture, performance optimization, backend integration, live-service systems, and development tooling. Proven track record delivering commercial titles across Google Play, App Store, and Steam while collaborating with cross-functional teams to build scalable and maintainable game systems.

Key Highlights

- 7+ years of professional Unity development experience.
- Shipped 20+ games across Android, iOS, PC, and WebGL.
- Released commercial titles on Steam, Google Play, and the App Store.
- Built backend-integrated features using Nakama, AWS, and Firebase.
- Developed custom Unity Editor tools that accelerated production workflows.
- Implemented CI/CD pipelines using GitHub Actions and Jenkins.
- Experience leading projects and mentoring junior developers.

Experience

Freelance Unity Developer, Freelancer	May 2024 – Present
- Delivered multiple Unity projects from prototype to production for international clients. - Developed mobile, PC, and WebGL games across RPG, Idle, Puzzle, and Casual genres. - Designed gameplay systems, progression mechanics, monetization features, and live-service functionality. - Owned architecture, implementation, optimization, testing, and deployment end-to-end. - Collaborated directly with clients to translate product requirements into production-ready solutions.	
Ajna Game Studio, Senior Unity Developer	Jul 2025 – Feb 2026
- Led development of commercial Unity titles for PC and mobile platforms. - Introduced AI-assisted development workflows that accelerated content production and prototyping. - Built custom Unity Editor tools and procedural systems that reduced manual content creation effort. - Managed platform-specific optimization and release processes for Steam, Android, and iOS. - Collaborated closely with designers and artists to deliver polished gameplay experiences.	
Flying Whales, Unity Developer Remote	May 2024 – Mar 2025
- Developed mobile games for Android and iOS using Unity. - Implemented gameplay systems, UI features, and live-service integrations. - Built automated build and deployment pipelines using GitHub Actions and Jenkins. - Improved development efficiency through workflow automation and tooling.	
WingsMob, Unity Developer	May 2023 – May 2024
- Developed scalable gameplay systems using Unity DOTS/ECS architecture. - Built internal tools that improved designer productivity and content iteration speed. - Integrated Nakama backend services and AWS infrastructure for live-service features. - Optimized game performance and memory usage on mobile devices.	
Super Snowball, Co-Founder Hanoi, VN	Jan 2022 - Dec 2022
- Led technical development of multiple mobile game projects from concept to release. - Defined architecture, coding standards, and production workflows. - Coordinated development priorities across design, art, and engineering. - Delivered commercial-ready game builds while managing project timelines and technical risks.	
Bazooka, Unity Developer Hanoi, VN	Aug 2020 - Dec 2021
- Developed gameplay systems, UI features, and monetization integrations across multiple mobile titles. - Integrated Firebase, AdMob, AppLovin, analytics, and in-app purchase systems.	
Rikkeisoft, Game Developer Hanoi, VN	Apr 2019 - Aug 2020
- Developed arcade and casual games using Unity. - Built browser-based mini-games using PhaserJS. - Collaborated with designers and QA teams to deliver stable releases.	

Skills

Game Development	Unity Engine, DOTS/ECS, Gameplay Architecture, Mobile Optimization, Unity Editor Scripting, WebGL, Addressables, ScriptableObjects, Object Pooling, Design Patterns, SOLID Principles, Profiling & Optimization
Backend & Live Services	Nakama, AWS, Firebase, REST APIs, JSON, Live Operations, Multiplayer Integration, Steamworks SDK
DevOps	Git, GitHub Actions, Jenkins, Docker
Programming Languages	C#, C/C++, JavaScript, Java, Lua
Databases	MongoDB, MySQL

Projects

Sweetoria Land Ajna Game Studio	2025
- Built a responsive 3D character controller powered by a unified input system, abstracting the control logic to effortlessly accommodate keyboard, Xbox, and PlayStation gamepads. - Designed and developed five unique, large-scale environments, overseeing intricate scene composition and asset distribution to deliver highly immersive 3D worlds. - Managed the Steam release pipeline, overseeing build verification, version deployment, and the integration of Steamworks SDK.	
Tap Legion: Idle Clicker RPG Freelancer	2025
- Implemented a robust data framework to handle high-volume progression curves and entity stats, enabling rapid iteration of the game's infinite difficulty scaling. - Designed the central gameplay loop to fuse multiple genres, carefully balancing the fast-paced “Tap-to-Spawn” combat with the deeper, long-horizon idle economy systems.	
Dino Jam – Parking Puzzle Game WingsMob	2023
- Developed backend-integrated gameplay features using Nakama and AWS to support live-service operations. - Implemented secure purchase validation, player progression tracking, and cloud-synced game data. - Optimized puzzle systems and runtime performance for Android and iOS devices.. - Worked closely with designers and artists to deliver content updates and improve player experience.	

Education

Bachelor of Information Technology, University of Engineering and Technology (VNU) Hanoi, Vietnam	2014 – 2018
